PROJECTS

Jobster

🔗 <https://jobster-best-jobs.netlify.app/landing>

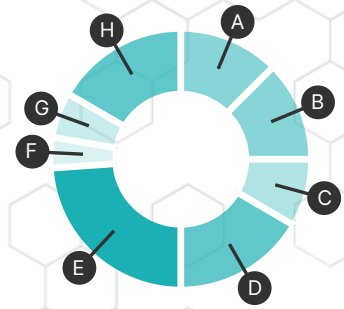

- Jobster it is a **React** app build with **Redux Toolkit**. If you want to realize any of the **CRUD** operation besides reading, you need an account. You can see part of the app in action by accessing *Demo App*. Data is **fetch**ed with **Axios**, while **React Router 6** provides a seamless navigation.

Ectmos

🔗 <https://ectmos.onrender.com/>

- To create this app I used the **MERN stack**(**MongoDB, Express.js, Node.js**) but I replace React with **Bootstrap**. I used **Postman** to monitor and test **APIs** and I manage to implement session along with **user authentication and authorization**. The website is **fully responsive**. I used **Mapbox** do add the map and the location of the event.
